

## To our friends, neighbors and fellow Dickson County residents:

I am very proud to announce the formation of the Board of Directors for your Turnbull Preservation Group.

After many weeks and months of hard and ground-breaking effort, we are excited to begin our work dedicated to addressing the need for the larger communities on whole, Dickson, Hickman, Williamson and Cheatham Counties, to protect the most valuable yet vulnerable asset we all have – our naturally abundant water resources in Turnbull Creek and its tributaries.

Our battle is just beginning considering an overwhelming and dangerous first threat to our ecosystem. Our mission is simple: to protect and preserve this watershed for today and for our posterity. Over the coming weeks and months, you will hear from us on many different issues and fronts related to your right to clean drinking water and our intent to represent all our communities in so doing. We are not a single-issue entity but rather a conservation group with dedicated purpose for generations to follow.

I encourage you to fully engage in this effort. It has not been so long ago we have witnessed the devastating effects of groundwater contamination. Not to be lost in any of this is the impact having a reliable and dependable source of clean water has on sustainability for all residents and businesses.

Our Board members include John Reuter, without whose effort this watershed may have already sustained significant and permanent damage. Joining John are Miranda Williams, Luke Fielder and Wayne Gray. Each have unique assignment and incredible desire to protect and defend your water resource. My name is Jeff Lunn and I am honored to serve as your President. We have an Advisory Council to whom we report, and we are graciously represented by Rodger Waynick, Attorney at Waynick Law in Dickson, TN.

Please join us as we begin this enduring effort to protect and preserve your watershed. All our communities' benefit from our success. On behalf of the Board of Directors, thank you for your past support.
